

Electronics Watch Affiliation Dues Structure in Australia

Affiliation options

Our affiliation dues structure has three bands, which reflects different amounts of annual spending on electronics hardware and different affiliation models, described below. All affiliates are required to report their annual ICT hardware spend each year throughout the duration of their affiliation.

Band A: A single institution that spends less than AUD \$7,999,999 on ICT hardware

Institutions that spend less than AUD \$7,999,999 annually on ICT hardware fall under Band A. These institutions pay 1.05% of their average annual ICT hardware spend or AUD \$8,400, whichever is lower. AUD \$5,200 is the minimum that any organisation can pay in affiliation dues.

- Example: An organisation that spends an average of AUD \$500,000 on ICT hardware will pay AUD \$5,200 in affiliation dues. An organisation that spends AUD \$500,000,000 will pay AUD \$8,400.

Band B: A single institution that spends AUD \$8 million or more on ICT hardware

Institutions that spend AUD \$8 million or more annually on ICT hardware fall under Band B. These institutions pay 0.105% of their average annual ICT hardware spend.

Band C: Procurement consortia and framework authorities

Procurement consortia, framework authorities and other similar organisations pay 0.105% of the combined annual average spend of all of its members on ICT hardware. These costs can be distributed in any way the consortium decides.
